# DreamBOX WiFi Solution

VAP11G is developed by HouTian Technology, it is the 802.11B/G wifi bridge device that can provide network cable for **DreamBOX**.   Please see the following guidance of VAP11G for your reference:

First: Configuration:

Take out the CD and insert to computer to program the software, and then configure it to wifi signal step by step.   All configurations are very simple, always click "NEXT".

Second: Find the port

- Find out the RJ45 port and USB port of DreamBOX. Pls see the following picture:

RJ45 Port   USB Port

The third: Connect to DreamBox

- The Ethernet and USB cable of VAP11G connect to the RJ45 and USB port of DreamBox separately. Pls see the following picture：

（When USB is used for power supply, external power supply and USB are powered at the same time is forbidden）

Remark: The application solutions of IPTV and IP camera are similar operations.
